Annex

Results and resources framework for Albania (2022–2026) .................................................. 8
I. **UNDP within the United Nations Sustainable Development Cooperation Framework**

1. Albania, with its population of 2.9 million, is an upper-middle-income country with a high Human Development Index of 0.791, Gender Development Index of 0.967 and Gender Inequality Index of 0.181. Women hold half of senior government positions. The economy is stable but underperforming, dependent on consumption and remittances, with low productivity and a limited tax base. Unemployment is structural and long-term at 11.8 per cent with a gender pay gap of 6.6 per cent. According to official figures, 38.3 per cent of the population suffer severe material deprivations and 23.4 per cent are at risk of falling into poverty (2018).

2. Albania faces multiple challenges that drive vulnerabilities, including weaknesses in rule of law, uneven institutional capacity, service gaps, limited investments in social services, degradation of natural resources and few labour opportunities.

3. The November 2019 earthquake and coronavirus disease (COVID-19) pandemic highlighted the need to address disaster risk management and the socioeconomic impact of these events, particularly on vulnerable groups and micro, small and medium-sized enterprises. The pandemic deepened gender inequalities, disproportionately affecting women, their livelihoods and access to essential health services, and increased incidents of gender-based violence.

4. In March 2020, the European Union opened accession negotiations. The country’s vision of sustainable development, the key drivers for reforms and political and public priorities, are accession to the European Union, sustainable economic growth and inclusive prosperity. The National Strategy for Development and Integration (NSDI) III is under preparation with interim nationalized Sustainable Development Goal indicators and targets.

5. This country programme reflects the comparative advantages of UNDP in supporting national reforms and upholding values of justice, human rights, equity and gender equality, through coordinated multisectoral approaches that facilitate systemic reforms. Drawing on its reputation as a United Nations system “integrator” for the 2030 Agenda for Sustainable Development and trusted impartial partner, UNDP will continue to liaise with the Government, donors and international institutions to mobilize financing to support economic transformation and eradication of multidimensional poverty; and establish systems that address risks, disasters and social injustice within the Sustainable Development Goals. Work at the local level and partnerships within the United Nations and across society position UNDP well to support aspirations to join the European Union and attain the outcomes of the United Nations Sustainable Development Cooperation Framework (UNSDCF).

6. The summary of the previous country programme’s performance concluded that UNDP support to development remains highly relevant in Albania. It is viewed as an innovative thought leader drawing on international experiences, with the ability to convene different stakeholders underpinning its integrator role for the 2030 Agenda through: (a) technical expertise, offering integrated and cross-sectoral solutions, combining policy and regulatory advice with capacity development; (b) a strong and agile operational presence; (c) established multi-stakeholder partnerships on priorities for European Union accession and the Sustainable Development Goals; and (d) trusted relations with all institutions.

---

3 Ibid.
6 Voluntary National Review on Sustainable Development Goals, June 2018 (link).
7 UNDP Albania country programme performance summary 2017-2021 (link).
7. The theory of change underpinning the country programme is that innovative approaches to inclusive, climate-friendly, gender-sensitive, sustainable growth in new competitive sectors, coupled with transparent, accountable governance systems, will boost jobs and businesses, identify investment opportunities, increase resilience and address interconnected vulnerabilities of climate, health and social injustice. UNDP will focus on local-level actions that together with national datasets and research, will inform national strategies and build forward better, particularly for those left behind.

8. Those left behind include women, children from low-income households, single parent households, persons with disabilities, the Roma and Egyptian communities, refugees, migrants, isolated rural communities, the elderly and bisexual, transgender, queer and intersex persons. Women who work in the care economy and in addition belong to minority groups and lack education, are the most vulnerable. Discrimination, stigmatization and gender-based violence are prevalent. Through a portfolio approach, UNDP will target these groups and increase social cohesion and social protection, in partnership with national and local governments, United Nations agencies and civil society. UNDP will partner with United Nations agencies on joint programmes related to leaving no one behind, strategic policy options for Sustainable Development Goal financing and ending violence against women.

9. The UNDP integration offer includes innovation, thematic expertise and financing for renewables and energy efficiency in line with Government’s plans to provide safe, affordable and clean energy to citizens; and for raising the national ambitions to combat climate change and increase resilience to natural and human-induced risks. UNDP will promote nature-based solutions to climate change adaptation and mitigation, not only tackling the climate crisis, inequality, poverty and food insecurity, but also providing incentives for new jobs in the maritime, blue and eco-circular economies. Partnering with United Nations agencies, UNDP will implement programmes on a green circular economy and sustainable economic development.

10. Economic growth is too low to converge with European Union living standards and achieve the Sustainable Development Goals. With United Nations agencies, UNDP will support employment measures for vulnerable groups, integrate small and medium-sized enterprises in global value chains, and support civil society to increase women’s access to careers in science, technology, engineering and mathematics. There are few incentives for adoption and innovation in digital technology, but a national digital data strategy and increasing digitalization are critical to accelerating the fourth industrial revolution. UNDP will focus on integrated solutions that address cross-cutting problems, i.e., identifying nature-based solutions that support the transition to a clean green economy, promote ecotourism and create new jobs in competitive sectors within the Western Balkan Regional Economic Area.

11. Key barriers to effective and efficient provision of services and that impact public trust are the lack of integrity and accountability of public institutions, slow progress on judicial reforms and corruption. Building on previous successes, UNDP will work with civil society and the government to improve human capacities and data systems for performance, transparency and planning. UNDP will work on the quality of services and rule of law, in close collaboration with United Nations partners.

12. With Albania positioning itself as a unifying actor for regional cooperation, security and stability, and taking the initial steps to establish the national disaster risk management system as a requirement to join the European Union Civil Protection Mechanism, UNDP will continue to promote knowledge-sharing and relevant practices across the subregion. To the extent possible, UNDP will promote South-South and triangular cooperation in support of these efforts.

---

13. The report of the United Nations mainstreaming, acceleration and policy support mission to Albania and the United Nations country team reached consensus on three highly effective solutions for policy and programming to accelerate progress towards European Union accession and achieve the Sustainable Development Goals: (a) human capital development and social inclusion; (b) sustainable, resilient and green economic growth and resource management; (c) effective, people-centred governance, human rights, rule of law and gender equality. These are translated into four UNSDCF outcomes, fully adopted by UNDP and underpinned by five cross-cutting principles of human rights; gender equality; inclusion and equality; transparent civic participation; and innovation.

14. The vision, value proposition and theory of change, which consolidates a number of past programmatic investments and proposes new transformative areas of action, were developed in consultation with over 200 partners representing civil society, private sector, academia, local and national governments, development partners and United Nations agencies, and validated in a meeting with over 17 Deputy Ministers.

II. Programme priorities and partnerships

15. This country programme reflects the country’s development priorities as articulated in the NSDI and the UNSDCF 2022-2026. In addition, it is aligned with the UNDP Strategic Plan and contributes to different European Union acquis chapters. The Sustainable Development Goal targets and indicators and national datasets are integral to programme outcomes and outputs. UNDP will contribute to these priorities, and application of its six signature solutions will help the country accelerate structural transformations. Specifically, UNDP will assist the country in the three main areas described below.

16. **Human capital development and social inclusion.** Albania needs well-functioning, fully operational and funded social inclusion and protection policies. UNDP will work with national partners to promote social cohesion and strengthen social protection systems, services and financing mechanisms to increase coverage and quality for vulnerable groups. With United Nations agencies, UNDP will ensure civic engagement and capacities for dialogue and implementation of social care plans.

17. **COVID-19 generated a sense of urgency to operationalize national policies, strengthen local government capacities and design and fund inclusive, gender-responsive and evidence-based services.** To reach those most left behind, UNDP will expand services at municipal and national levels in education, health, social care, employment, vocational training and housing. UNDP, with the European Union, will continue investments in the education sector affected by the 2019 earthquake, adopting European Union standards and expanding information and communication technology measures as a post-COVID-19 recovery strategy. UNDP will technically lead implementation of the United Nations COVID-19 socioeconomic recovery plan.

18. **Sustainable, resilient and green economic growth and resource management.** UNDP will support policies that accelerate an inclusive, productive and sustainable economy, enhance climate resilience and adaptation planning, and transition into a clean green economy, in line with the Government’s national strategies. This will be done through: (a) strengthening governance mechanisms to address climate change, biodiversity loss, pollution and land degradation; (b) promoting ecotourism and circular bioeconomy; (c) promote a “source-to-sea” approach, and strengthen transboundary cooperation for water resources management in the Drini River Basin; (d) address the skills mismatch of youth and women for innovation and digitalization; and (e) support value chains of micro, small and medium-sized enterprises, decent jobs and inclusive employment, particularly for persons with disabilities and women. UNDP will support industries to become more energy-efficient, increase the potential of the forestry sector for removal of greenhouse gasses, and support...
the country’s green growth trajectory. UNDP will support promotion of nature-based tourism that sustains livelihoods and protected areas, while improving ecosystem services and financial sustainability.

19. UNDP will support entities to have improved systems and capacities to design and implement innovative policies, particularly in relation to qualitative skills development that promotes a digital economy, entrepreneurship and competitive green businesses. UNDP will focus on integrated multisectoral solutions that provide: the necessary skills, vocational education and training; access to decent jobs and innovative technology; sustainable livelihoods; and business opportunities. With young people (aged 15-24) comprising 25 per cent of the population, UNDP will continue to promote youth as productive human capital and partner with labour-market stakeholders to boost employment and entrepreneurship. UNDP will consolidate reforms, strengthen capacities, address skills mismatch and increase labour force participation especially for women and young people, persons with disabilities, Roma and Egyptian communities and the long-term unemployed.

20. With inclusive growth being a key driver for reducing vulnerability and building resilience, particularly for the poor and most disadvantaged, UNDP will continue to support policies and measures leading to an expedited economic recovery and increased competitiveness and productivity of (female-led) micro, small and medium-sized enterprises. UNDP will work towards improved environments for digital innovation through support for data-driven innovations, bringing higher education closer to the labour market and supporting new course curricula for future skills. Increasing vocational education and training to match labour market demands and integrating small and medium-sized enterprises in global value chains are additional strategies. A vision and road maps for green growth and a blue economy will be formulated, thus ensuring growth that protects natural resources.

21. To contribute to a strengthened risk and disaster management system, UNDP will assist the Government in driving policies and actions that focus on prevention and reduction of disaster-related risks, increasing resilience of infrastructures, ecosystems and society, and enabling adaptive capacities, all as a means to reduce the long-term vulnerability of the population and protect development investments, particularly in at-risk areas. With a “knowing better, losing less” approach, UNDP will focus on local-level risk assessments, utilizing data and knowledge in parallel with prevention measures. Raising the national ambition to combat climate change, increasing resilience to natural and human-induced risk, and gender-responsive disaster strategies remain priorities.

22. **Effective, people-centred governance, human rights, rule of law and gender equality.** UNDP will broaden partnerships for a stronger good governance framework, in line with the National Public Administration Reform Strategy. UNDP will foster a citizen-centred, gender-sensitive, inclusive approach, while further developing institutional capacities in policymaking and implementation, promoting a culture of participation and dialogue for development, and increasing transparency, integrity and accountability. Based on its initial successful experiences in rolling out integrity planning in municipalities, UNDP will build national capacities to bring to scale and monitor this initiative.

23. Innovation and digitalization will be explored to establish robust, modernized and efficient service delivery. UNDP will support integrated citizen-centred services and further expand municipal one-stop-shop networks to reach remote, mostly rural areas.

24. UNDP will support legal, policy and institutional reforms related to human rights commitments and civic engagement; capacity development for policymaking and monitoring; and access to justice for vulnerable people. UNDP will continue to support the People’s Advocate, and the Commissioners for Information and Data Protection and Protection from Discrimination. UNDP will continue to work towards ending all forms of domestic, sexual and gender-based violence and unfavourable social norms and gender stereotypes, supporting coordinated referral mechanisms and integrated services, safe accommodation and accessible emergency and specialized support. It will continue to
support the Government to address structural and systemic barriers to gender equality and women’s empowerment in policy formulation and implementation, and to generate quality gender-disaggregated data for targeted, informed investments and quantifying of results.

25. The programme will support data availability and a more data-driven culture for strengthened sectoral analysis, evidence-based policymaking and promotion of a culture of accountability and performance assessment. Policy analysis and formulation will include a gender equality focus and gender-disaggregated data. UNDP will engage gender champions and support increased civic engagement and dialogue platforms.

26. UNDP will continue to work closely with existing donors, vertical funds and United Nations agencies, diversifying funding sources by partnering with new donors including on an integrated national finance framework, while broadening engagement with the private sector, academia, civil society, national human rights institutions and the media.

III. Programme and risk management

27. This country programme document (CPD) outlines UNDP’s contributions to national results and serves as the primary unit of accountability to the Executive Board for results alignment and resources assigned to the programme at country level. Accountabilities of managers at the country, regional and headquarter levels with respect to country programmes are prescribed in the organization’s programme and operations policies and procedures and internal control framework.

28. The programme will be nationally executed. If necessary, national execution may be replaced by direct execution for part or all of the programme to enable response to force majeure. The harmonized approach to cash transfers will be used in a coordinated fashion with other United Nations agencies to manage financial risks. Cost definitions and classifications for programme and development effectiveness will be charged to the concerned projects.

29. UNDP will participate in joint Government–United Nations coordination mechanisms. Programme and project boards will be established in line with the social and environmental standards and accountability mechanism.

30. The main risk to the programme relates to the ongoing impact of COVID-19 and an unforeseen impact on the capacity to implement the programme or achieve its results. Possible changes in the process and requirements for European Union accession may impact national development policies. Natural or man-made hazards, with insufficient institutional and local preparedness to respond, can impact the ability of UNDP to support Albania in delivering its development priorities.

31. Risks will be managed through coordination and partnerships; advocacy and policy dialogue; regular monitoring of risks, project and results; and updating of contingency plans for the country office and national emergencies.

IV. Monitoring and evaluation

32. The monitoring and evaluation plan will be implemented following endorsement of the CPD by the Executive Board. The results framework is aligned with indicators related to European Union accession, the NSDI and the national indicator framework for the Sustainable Development Goals. This demonstrates a clear linkage between the support provided by UNDP, the programme outcomes and sustainable development results.

33. The planned evaluations will contribute to accountability, learning and achievement of strategic results. They meet all the required criteria, provide sufficient and balanced coverage of the programme’s areas of engagement and emphasize national ownership and capacity development. Planned project evaluations relate to ongoing projects. Results of new projects will be captured in the midterm review or in future project evaluations added during yearly
reviews of the evaluation plan. Socioeconomic, political and environmental risks were considered during the formulation of the evaluation plan. Ethical practices and lessons learned shape policy advice, advocacy and project design and implementation. An independent country programme evaluation will be conducted in 2025.

34. UNDP will employ national monitoring systems, official statistical data and reports from line ministries, development partners and research institutions to measure its contribution to national results. Other data, perception surveys and reports will be used to assess results and behavioural change. The National Statistical Office and other partners will receive support to continue improving data quality. Data for baselines and targets will be disaggregated by sex, geography and income and increasingly identify those left behind. The programme will reinforce innovative tools to manage data collection and analysis at the country programme outcome and output levels.
## Annex. Results and resources framework for Albania (2022-2026)

**NATIONAL PRIORITY:** NSDI II Pillar 3. Investing in human capital and social cohesion. **SDGs:** 1, 5, 10, 16.

**COOPERATION FRAMEWORK OUTCOME:** By 2026 there is increased and more equitable investment in people, removing barriers and creating opportunities for those at risk of exclusion.

**RELATED STRATEGIC PLAN OUTCOME:** 1. Eradicate poverty in all its forms and dimensions.

### COOPERATION FRAMEWORK OUTCOME | DATA SOURCE AND FREQUENCY OF DATA COLLECTION, AND RESPONSIBILITIES | INDICATIVE COUNTRY PROGRAMME OUTPUTS | MAJOR PARTNERS / PARTNERSHIPS FRAMEWORKS | ESTIMATED COST BY OUTCOME ($)
--- | --- | --- | --- | ---
Indicator: Number of (i) households; (ii) persons with disabilities (PwD); (iii) percentage of refugees and persons granted temporary protection covered by social protection system, by sex and age (SDG 1.3.1)
Baseline: (i) 66,629 (ii) 72,711 (iii) 2.3%
Target: (i) 65,000 (ii) 70,000 (iii) 15%
Indicator: Socioeconomic gaps between Roma and non-Roma, by sex (reflected in rates of employment, registration and access to services)
Baseline: (i) Employment Non-Roma: 27%; Roma: 18%; Roma females: 11%
(ii) Possession of identity cards Non-Roma: 97%; Roma: 90%; Roma females: 91%
Data Source: Regional Roma Survey

| **Output 1.** Social care and inclusion: Social protection systems and mechanisms are strengthened to increase the coverage, quality, and monitoring of monitoring of social services and social inclusion for vulnerable men and women is enhanced.

**Indicator 1.1:** Number of men and women at risk of exclusion
Baseline (2020): PwD 2,000; Risk of exclusion 1,600.
Target (2024): PwD 4,000; Risk of exclusion 4,000.
Data source: UNDP, State Social Service; Ministry of Health and Social Protection (MoHSP)

**Indicator 1.2:** Number of local governments and subnational authorities with enhanced capacities to plan, budget, implement and monitor local social care and inclusion policies (including social housing) for vulnerable groups designed in a collaborative, evidence-based and gender-sensitive manner.
Baseline (2020): 24 LGUs; subnational authorities 3; professional staff 100
Target: 40 LGUs; 7 subnational authorities; professional staff 250
Data source: State Social Service, MoHSP, UNDP

**Indicator 1.4:** Level of implementation of Roma and Egyptian equality, inclusion and participation action plan and measures.
Baseline: 3.68 (2019)
Target: 3.8
Source: MoHSP |

**NATIONAL PRIORITY:** NSDI Fundamental Principle - Good Governance, Democracy and Rule of Law; NSDI II Pillar 3. Investing in human capital and social cohesion; NSDI II Priority. Delivery of innovative, citizen-centred public services (Improving the quality of life and the environment for all; Strengthening governance and the government’s capability to deliver). **SDGs** 5, 10, 11, 16.

**COOPERATION FRAMEWORK OUTCOME:** By 2026, governance is more transparent and accountable, enabling people (women and girls, men and boys, and persons at risk of exclusion), to enjoy quality, inclusive services, enhanced rule of law and access to justice in line with Albania’s human rights commitments.

**RELATED STRATEGIC PLAN OUTCOME:** 2. Accelerate structural transformations for sustainable development.
