#### Progress towards the 90-90-90 targets

- **77%** of people living with HIV know their status.
- **91%** of people living with HIV know their status and are on treatment.
- **59%** of people living with HIV on treatment have decreased viral load.

**TB**

- **4,717** key and vulnerable populations tested for HIV and syphilis using SD Duo rapid test kits.
- **61 out of 67** people living with HIV that know their status are on treatment.
- **88%** of all TB cases registered for treatment were successfully treated.
- **14 per 100,000 population** TB mortality rate for the 11 programme countries (average).
- **7** rif resistant / multi-drug resistant TB cases diagnosed.
- **100%** treatment success rate of rif resistant / multi-drug resistant TB (measuring 2018 cohort outcomes).

---

1. Refers to clients being reached with the minimum components of the HIV prevention programmes including IEC / BCC, condoms and lubricants and HIV testing referral. If one component of this package is not offered, then the client is not counted as having received the minimum HIV prevention package of services.
2. Refers to UNDP regional programme estimate for 11 PICs and not spectrum estimates.
