WHERE ALL eVIN HAS REACHED

UTTARAKHAND | ODISHA | TRIPURA | ANDAMAN & NICOBAR ISLANDS
GUJARAT | DAMAN AND DIU | ARUNACHAL PRADESH | MEGHALAYA
MADHYA PRADESH | RAJASTHAN | PUDUCHERRY | JHARKHAND
UTTAR PRADESH | MANIPUR | DADRA AND NAGAR HAVELI | LAKSHADWEEP
NAGALAND | BIHAR | HIMACHAL PRADESH | TELANGANA | SIKKIM
CHHATTISGARH | ASSAM | RAO | JHARKHAND | KARNATAKA
ANDHRA PRADESH | MAHARASHTRA | HARYANA | PUNJAB
KERALA | TAMIL NADU | UT OF JAMMU & KASHMIR | MEGHALAYA | NCT OF DELHI | LAKSHADWEEP | WEST BENGAL

eVIN is a path-breaking technological innovation that aims to ensure equity through efficient distribution and timely availability of vaccines to all children. The mobile and web based application is being implemented by the Ministry of Health & Family Welfare (MoHFW) and supported by the United Nations Development Programme.

An effective model of health system strengthening, eVIN enables real-time visibility of vaccine cold chain logistics by digitizing stock supplies and storage temperature of vaccines across vaccine cold chain points in India, home to the world’s largest birth cohort of over 27 million.

WHAT eVIN DOES

- **strengthens**
  - the immunization system by deploying trained human resources in every district for constant support to estimate vaccine requirements and provide supportive supervision

- **develops**
  - standard operating procedures for systematic record-keeping of vaccine logistics, online indent and vaccine distribution under the guidance of MoHFW

- **facilitates**
  - maintenance of optimum vaccine stocks by reducing instances of vaccine wastage and stock-out and enabling optimum safety quantity based on historic consumption

- **improves**
  - efficiency of vaccine cold chain logistics management by introducing state-of-the-art technology for digitizing vaccine stocks and real-time tracking of vaccine movement

- **enables**
  - quick view of all vaccine logistics for real-time monitoring on MEVIN mobile app for state and district health programme managers

- **infoms**
  - policy and decision-making for immunization supply chain management at all levels

- **ensures**
  - quality and safety of vaccines through real-time information on storage temperature with the help of SIM-enabled temperature loggers

- **empowers**
  - the vaccine cold chain handlers at all health centres through intensive training on eVIN

WHAT eVIN ACCOMPLISHED SO FAR

- **Vaccine inventories digitized at nearly 28,529 cold chain points across 731 districts of 28 states and 8 union territories in India.**

- **More than 1300 comprehensive training programmes on eVIN conducted for more than 47,750 cold chain handlers and vaccine store managers.**

- **Over 5 million online transactions being made on eVIN every month recording vaccine issues, receipts, discards and transfers.**

- **More than 24,100 temperature loggers installed for Remote Temperature Monitoring of all cold chain equipment. Committed to systems strengthening, UNDP strives to extend innovation for integrated service delivery to strengthen programmes in health and other sectors.**
