

PAKISTAN NHDR'S 3 Ps OF INEQUALITY

Inequality in Pakistan is driven by:

POWER

Groups that make use of loopholes, networks, and policies for their benefit.

PEOPLE

Deeply-embedded belief systems that encourage bias against minorities.

POLICY

Systems and strategies that cater to the powerful, or are just ineffective.

Pakistan National Human Development Report on Inequality

IN WHAT WAYS IS PAKISTAN UNEQUAL?

#PKNHDR #EqualPakistan #FarqKoTarqKaro

What are the NHDRs?

The NHDRs combine data, participatory research, and policy recommendations on human development themes.

What is inequality?

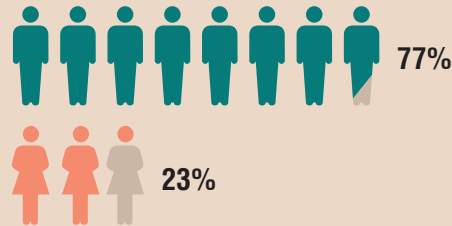

Inequality can refer to differences in income and wealth (economic inequality), or the unequal treatment of different socio-political groups (inequality of opportunity). This NHDR highlights the status of inequality at the national and provincial levels in Pakistan.

What makes this report inclusive?

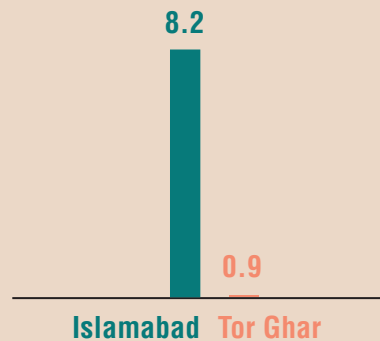

No report on inequality could be complete if the voiceless remained unheard.

Our **focus groups** with vulnerable communities all over Pakistan give us a deeper understanding of their lived experiences, and our **key informant interviews** with technical experts, journalists, and CSO leaders provide insights from people who've spent their lives working with the grassroots on issues of inequality.

LABOUR FORCE COMPOSITION

MEAN YEARS OF SCHOOLING

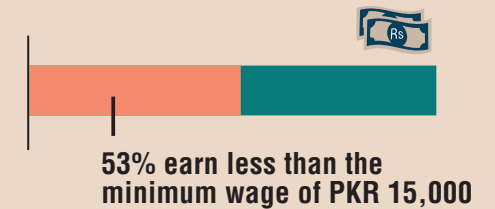

PAKISTANIS IN POVERTY

4 out of 10 live in multidimensional poverty

WORKERS

CHILDREN OUT OF SCHOOL

22.8 million children are out of school
