1- **Government Response**

As of June 22th, Ecuador has reported 50,640\(^1\) confirmed and 4,223\(^2\) deaths. The most affected cities are Guayaquil, Quito and Santo Domingo; however, all 24 provinces so far have confirmed COVID-19 positive cases.

On March 16th, Ecuador declared a national state of emergency, this measure is on until August 13\(^{th}\), all provinces are applying curfews based on their local situations. A travel ban is still in place restricting international flights, although national flights as well as ground transportation are gradually reopening operations. Academic activities are still performed remotely. This lockdown has put pressure on the formal and informal economy, by aggravating an already contracted demand due to a pre-existing economic crisis. The Government announced several social emergency actions, despite being under severe fiscal and budgetary constraints, mainly because the decrease of the oil price oil, on which the national budget relies.

In order to have a comprehensive and standardized assessment in relation to the COVID-19 in the recovery period, the government of Ecuador, through the National Emergency Operations Committee (COE-N), issued a resolution establishing a Post Disaster Needs Assessment. The PDNA process is about to finish, the information gathered on baselines and effects on the prioritized sectors are being diagrammatized in a final report.

Since April the President of Ecuador, Lenin Moreno, has been issuing some economic measures to address the fiscal situation and the emergency. Measures include (I) delivery of a two months family protection voucher of 60 USD aimed at people in the informal sector, poor households, small retailers and producers whose income is less than 400 USD monthly (the target was 950,000 households), (II) a reduction in the salaries of public sector authorities, also working hours for public servants will be reduced in 25% (six hours), and the monthly salary in %16,66, (iii) renegotiation of the external debt; (iv) the government announced a cut in public spending of over 4 billion dollars: in public sector payroll, goods and services and debt renegotiation (interests); (v) announcement of a price range that will regulate the price of fuel. (vi) creation of a Financing Programme of 1.1500 million dollars to kickstart production, using funds from the IFIs, the programme is called “REACTIVATE ECUADOR”.

Some measures require legal reforms, the Government has sent a bill to the National Assembly to face the crisis due to Covid-19 which is currently being discussed. The “Humanitarian Support Law” includes measures aimed to: protect leases (no one can be evicted for non-payment of obligations during the time of the emergency and 60 days after); extend social security health coverage for the unemployed and unemployment insurance; and protect private education (suggests that households with economic difficulties and private schools reach agreements to reduce costs).

2- **UNDP Support to Prepare, Respond and Recover**

**Strengthening Health Systems**

- Provide with protective equipment to (1) hospital staff in Bolivar province (Key partners: European Union and Direction of Health of Chillanes); (2) Hospital staff in Machala and farmers (Key partners: Ecuadorian Institute of Social Security, the Ministry of Agriculture and Livestock.
