

Unearmarked Core Contributions in 2018

Contribution data preliminary as of February and subject to change.

While there are multiple channels to contribute to UNDP, it is unearmarked core resources that is the pillar of UNDP's support to the world's poorest countries to eradicate poverty and inequality, attain sustainable development, and strengthen resilience to crisis.

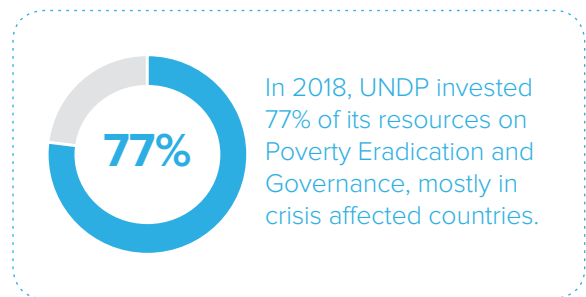

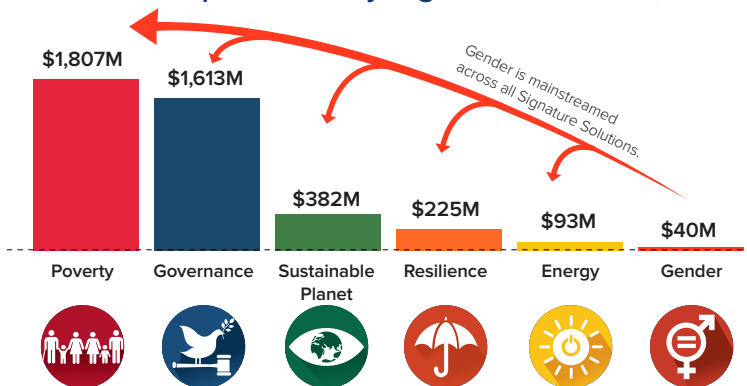

Core resources allow UNDP to enable coordinated, flexible, and rapid responses to development needs and emergencies; provide capability for multi-sectoral and integrated solutions; support countries to leverage financing for the SDGs; and enhance thought leadership, innovation, and quality assurance.

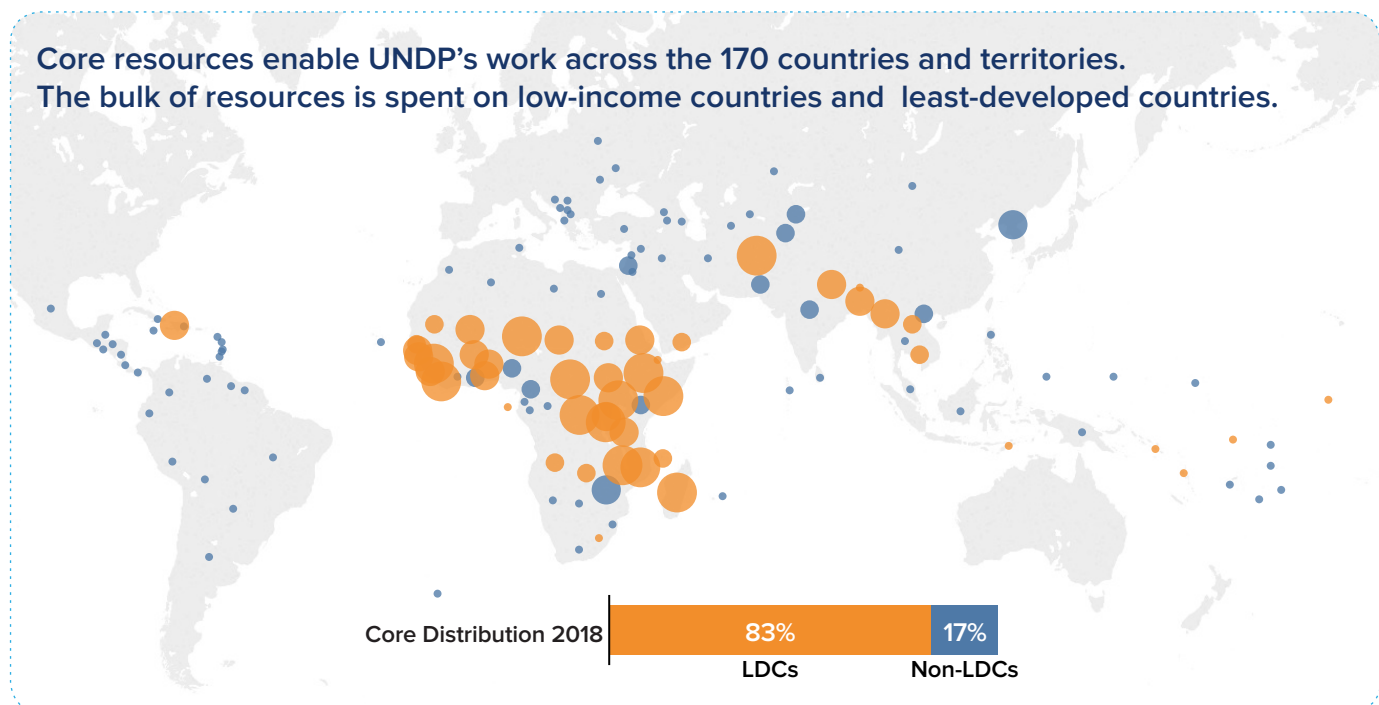

Focus on poverty eradication, governance and environment.

To better focus its resources to deliver on the 2030 Agenda, UNDP has identified a set of cross-cutting approaches to development called Signature Solutions, in poverty, governance, environment, resilience, energy and gender. In addition to the gender signature solution, UNDP mainstreams gender equality in all its work across all signature solutions.

UNDP total expenditure by Signature Solution, 2018:

Core resources enable UNDP's work across the 170 countries and territories. The bulk of resources is spent on low-income countries and least-developed countries.

UNDP appreciates all its 2018 Core supporters
