UNDP in Ghana Brochure

About UNDP

The United Nations Development Programme (UNDP) works in 170 countries and territories, focusing on poverty eradication and reduction of inequalities and exclusion.

UNDP in Ghana

In Ghana, UNDP works within the framework of the Government-UN Sustainable Development Partnership (UNSDP), which responds to Ghana's development priorities and Sustainable Development Goals (SDGs) for People, Prosperity, Planet, Peace and Partnerships by 2030. UNDP contributes to the achievement of Ghana's Coordinated Programme of Economic and Social Development Policies (2017-2024) and the Ghana Beyond Aid Charter towards Ghana@100 (2057).

What We Do

UNDP in Ghana focuses its development interventions on three main programme areas. These are:

Governance and Peace Building

We work with national partners to strengthen the trust of public institutions, empower citizens, and promote social cohesion and peace in Ghana.

Environment and Climate Action

UNDP promotes nature-based solutions and climate action to expand human development while protecting the planet.

Inclusive Development

UNDP strengthens capacities for resilience, inclusion, and SDGs investment. We focus on enabling local and border economies to recover and build resilience; and support Women and Youth-led Micro, Small and Medium Enterprises (MSMEs) to leverage the agreement on the African Continental Free Trade Area (AfCFTA). We also foster partnerships to attract finance and private sector investment for resilience building and inclusion.
